Aquajet To Unveil Revolutionary New Product During Worldwide Digital Launch

[Aquajet](#), a global leader in Hydrodemolition robot manufacturing, will introduce a revolutionary new product through a worldwide digital launch on Wednesday, May 27, at 2 p.m. Central European Summer Time (CEST).

"We originally planned to share this exciting new technology at our Aquajet Open Days, but world events changed that plan," said Roger Simonsson, Aquajet CEO. "However, innovation and our commitment to the Hydrodemolition industry are as strong as ever, so we're bringing our product to the market in a new way."

The 35-minute event will be in a webinar format with 20 minutes to see the new product and learn about the features and benefits, followed by 15 minutes of Q&A. Simonsson, Chief Engineer Ronnie Hilmersson and Director of Sales Patrik Andersson will highlight key features of the new equipment, such as reduced noise and a compact footprint. The Aquajet team will also explain how this latest innovation can enhance environmental stewardship while lowering overall operating costs.

Aquajet customers provided the inspiration for the new technology by sharing their challenges and successes.

"Our customers really help us form a vision for new products that will revolutionize the industry," Simonsson said. "Our focus is solving their most pressing problems. Simply tweaking the technology isn't enough; we need to innovate to truly make a difference."

Be among the first to see Aquajet's new technology. Register for the digital product launch at www.aquajet.se.

"We are so grateful for the amazing energy between customer and manufacturer that helps us all be successful," Simonsson said. "We can't wait to show everyone what we've been up to."

About Aquajet

Aquajet, which was acquired by Brokk AB in 2016, is known as the industry leader in Hydrodemolition machines and solutions, both in terms of quality and volume. The company's headquarters and production facilities are in Holsbybrunn, Sweden. Similar to Brokk, Aquajet sells globally.
